

Gather

Daniel Ruskin, Aristotle
Kaporis, Luca Piccinini, Ivana
Krajina, Greg Forston

The Problem:

No one likes brightspace, including professors! Your to-do list is all scattered across different sites, but is the solution really another brightspace?

Introducing: Gather

A platform for college students to automatically update and manage all their to-do lists across multiple platforms! Decisions on what content to look out for is user-decided, but managed by AI.

Features:

- ▶ Calendar-formatted to-do list
 - ▶ Automatic updating of contents
 - ▶ User-created parameters
 - ▶ Adding contents from file
 - ▶ Task modules
- Submenus
 - Recommended jobs
 - Relevant sites

Brightspace No More!

- Need authorization from LMU's Brightspace administration team in order to register our application
- When a task requires a user's brightspace for the first time, they will be redirected to Brightspace and asked to log in, where they can then give permissions to our application.

Permissions requested Review for your organization

 D2L MS Teams Meeting App
d2l.com

This application is not published by Microsoft or your organization.

This app would like to:

- ✓ Read and create user's online meetings
- ✓ Sign in and read user profile

If you accept, this app will get access to the specified resources for all users in your organization. No one else will be prompted to review these permissions.

Accepting these permissions means that you allow this app to use your data as specified in their terms of service and privacy statement. **The publisher has not provided links to their terms for you to review.** You can change these permissions at <https://myapps.microsoft.com>. [Show details](#)

Professor: B.J. Johnson, PhD
robert.johnson@lmj.edu
Office Hrs: Mon — Thur, 10:30 - 12:30
Drop in or by appointment
Office Location: Doolan 220
Dept. Admin.: Tanya Kapoor
Doolan 101, 310.338.xxxx

Prerequisites:
[Consent of Instructor required]

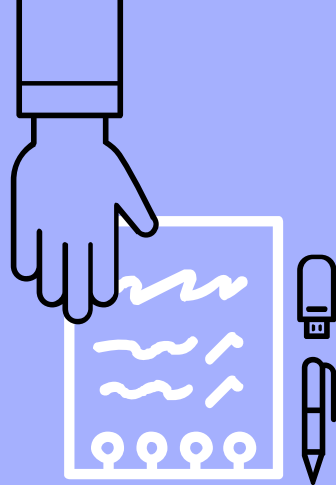

[Dedicated to the memory of Professor Phil Dorin, teacher, mentor and friend.]

Course Description from the [Latest University Bulletin](#)

"Introduction to essential software engineering principles guiding design, development, implementation, and management of modern software projects. Software life cycle models, problem description, specification, and analysis. Object-oriented and use-case analysis methods. Requirements specification, development planning and basics of project management, SEI/CMMI processes, Agile software development methods and activities, testing philosophies, ethical concerns, conflicts, and resolution strategies. Technical presentation skills. "

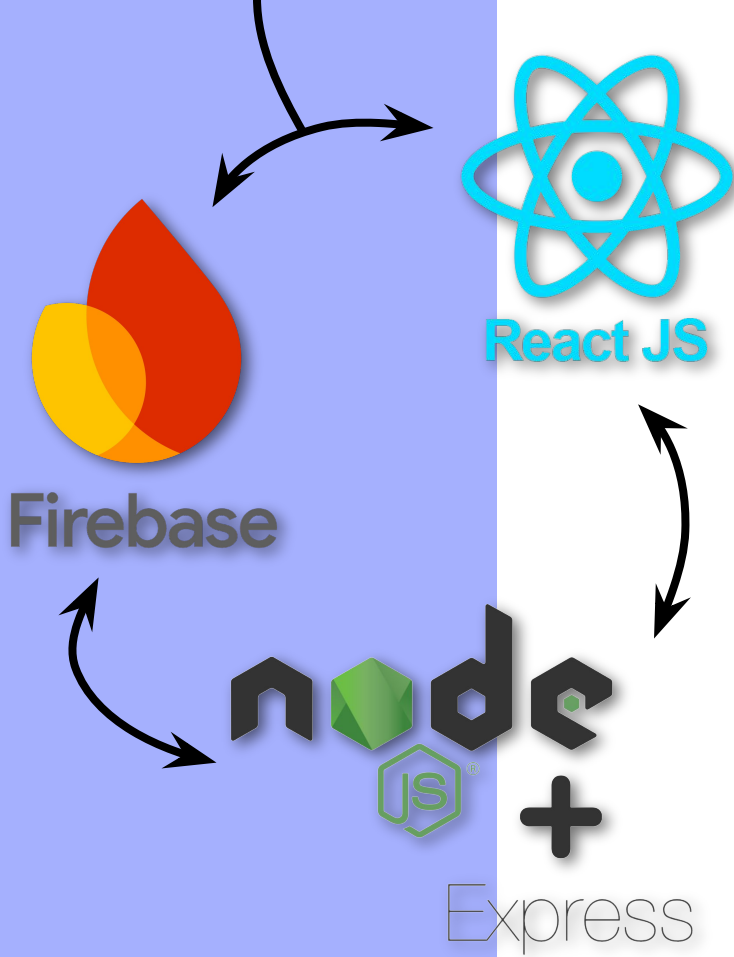

How we plan to scrape!

- LLM APIs need raw text data
- Extract raw HTML data from URLs, and clean them
- Extract raw PDF text information, organize it to most relevant
- Send only cleaned and concise text data into LLM to be parsed into activities in our desired format

```

Our Stack!

- LLM returns correctly formatted due date information, which can then be uploaded to our Firebase database!
- In order to manage the creation and deletion of these assignments, we will be using a NodeJS/Express backend
- And for displaying those assignments to the user, we plan to use ReactJS!

What If LLama 3 or Brightspace API makes a mistake?

The screenshot shows the 'Assignment Creation Review' page in the EduFlow system. The page header includes the EduFlow logo, a user profile for 'Professor Alistair Vance', and a breadcrumb trail: 'Home > Assignments > Review'. The main title is 'Assignment Creation Review', and a summary at the top right states 'Assignments Total: 18 | Review Needed: 1'. Below the title, a message reads: 'Reviewing 18 assignments generated for Spring Semester 2024. Edit, adjust, or remove any items before creating.' The main content is a table with five rows, each representing an assignment. The table has four columns: 'Select', 'Assignment Details', 'Due Date', and 'Action'. The first two rows are marked 'READY' with green dots. The third row is marked 'REVIEW' with a yellow dot and a warning icon, indicating a 'Duplicate topic flag.' The last two rows are marked 'READY' with green dots. At the bottom right, there are two buttons: 'Back to Edits' and 'Create All 18 Assignments'.

Select	Assignment Details	Due Date	Action
☐	Ancient Civilizations Essay (History Sec A) ● READY	May 10, 2024	Create
☐	Algebra II Quiz 4 (Math Sec B) ● READY	Apr 28, 2024	Create
☐	⚠ Intro to French Vocab (French 101) ● REVIEW Duplicate topic flag.	May 05, 2024	Review
☐	Biology Lab Report (Science Sec C)	May 15, 2024	Create
☐	Creative Writing Project (English Sec B) ● READY	May 20, 2024	Create

- Users will be given an assignment creation review page before any assignments are created for approval
- This screen will give an overview of all assignments being created, with dupes flagged
- Assignments grouped together, so meaningless assignments can be rejected all at once together.
